

Noran Khaled Mohamed – Flutter Developer

Phone: +201100709795 | Mail:norankhaled1132004@gmail.com | [GitHub](#) | [LinkedIn](#)

Summary

Junior Flutter Developer with hands-on experience building cross-platform mobile applications using Flutter and Dart. Skilled in responsive UI development, state management (Provider/Cubit/Bloc), REST API integration, Firebase, and local storage using SQLite. Passionate about building clean, scalable applications and continuously improving software engineering skills.

Education

Bachelor of Computer Science – Al-Nahda University

Expected Graduation: 2026

Relevant Focus: Mobile Application Development, Software Engineering

Experience

Flutter Developer | Personal Projects

- Developed multiple Flutter applications including e-commerce, productivity, and habit tracking apps.
- Implemented responsive UI and reusable components.
- Worked with local storage, API integration, and state management.
- Managed source code using Git and GitHub.

Technical Skills

Programming Languages: Dart, Python | **Core Concepts:** OOP, Data Structures | **Mobile Development:** Flutter, Responsive UI Design, State Management (Bloc, Provider, Cubit) | **Databases & Storage:** SQLite, Firebase (Authentication, Fire store/Realtime Database) | **API Integration:** RESTful APIs | **Architecture & Best Practices:** MVVM, Clean Code, SOLID Principles | **Version Control:** Git, GitHub

Soft Skills

Problem Solving | Teamwork & Collaboration | Communication | Time Management | Adaptability | Attention to Detail.

Projects

Livo Care – Healthcare Application

GitHub: [Livo Care](#)

- Built a Flutter-based healthcare application to help patients monitor Non-Alcoholic Fatty Liver Disease (NAFLD) status.
- Implemented Firebase / API integration for authentication and data handling.
- Applied Provider / Bloc / Cubit for state management.
- Focused on responsive and user-friendly UI.

Shopping App – E-Commerce Application

GitHub: [Shopping App](#)

- Built a full Flutter shopping application with product listing and cart functionality.
- Implemented API integration / local data handling.
- Applied Provider/Bloc/Cubit for state management.
- Focused on responsive and user-friendly UI.

Todo App – Task Management Application

GitHub: [Todo App](#)

- Developed a task management app using Flutter.
- Implemented CRUD operations for tasks.
- Used local database
- Designed clean UI for productivity workflow.

Habit Tracker App

GitHub: [Habit App](#)

- Built a habit tracking mobile app for daily progress monitoring.
- Implemented local persistence and progress tracking logic.
- Focused on UX simplicity and performance.
